

Let peace spiral upwards

Nuclear weapons are illegal

●As of 22nd January 2021, nuclear weapons are illegal in international law with the Treaty on the Prohibition of Nuclear Weapons (TPNW) coming into force - the treaty explicitly bans the use, development, testing, production, acquisition, possession, stockpiling, transferring, receiving, threat of use and deployment of nuclear weapons.

●*The symbol above combines the CND nuclear disarmament symbol with spirals which are a common pre-Celtic symbol in Ireland but have in fact been almost universal.*
